 **optec** S.p.A.  
OPTICAL & OPTOELECTRONIC SYSTEMS

BACK

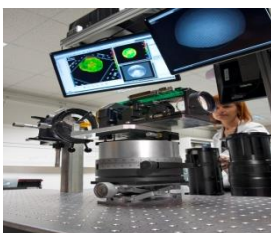

### Products

High performing Optical and Optoelectronic systems, Payloads, Star Tracker, SWIR optics and multichannel camera systems.

### Technologies

High precision multi configuration systems alignment and calibration. Clean room environment up to ISO6 and ISO6 levels.

### Services

High precision optical measures with bleeding edge tooling, consultancy in high performance optical design.

### OPTEC spa

*Always on the leading edge of optomechanical development Optec is directly involved in design and engineering of optical systems for satellites or space stations for various Companies around the world.*
