# CARACOL

BACK

## Products

A range of parts such as: large scale tools, jigs, molds, satellite deployer parts, casing for avionic systems, and research projects on parts for autoclave use.

## Technologies

With its AM large-scale robotic system and a wide range of state-of-the-art industrial printers, it produces advanced components in composite materials.

## Services

From design, engineering for AM, to production (prototypes, series and finished parts), as well as support in internalizing AM.

## Caracol s.r.l.

*Extreme Additive Manufacturing, solutions with no scale limits. We integrate all competences: from design and engineering for AM, to production of complex and large-scale parts, with know-how on advanced materials, and on both hardware and software for AM.*
